About Fracspace

Fracspace is a real estate firm that has successfully facilitated co-ownership for hundreds of fractional owners, generating over ₹35 crore in revenue. Now, we are evolving into a one-stop solution for all real estate needs—from purchasing and maintaining properties to renovation, management, sales, and promotion.

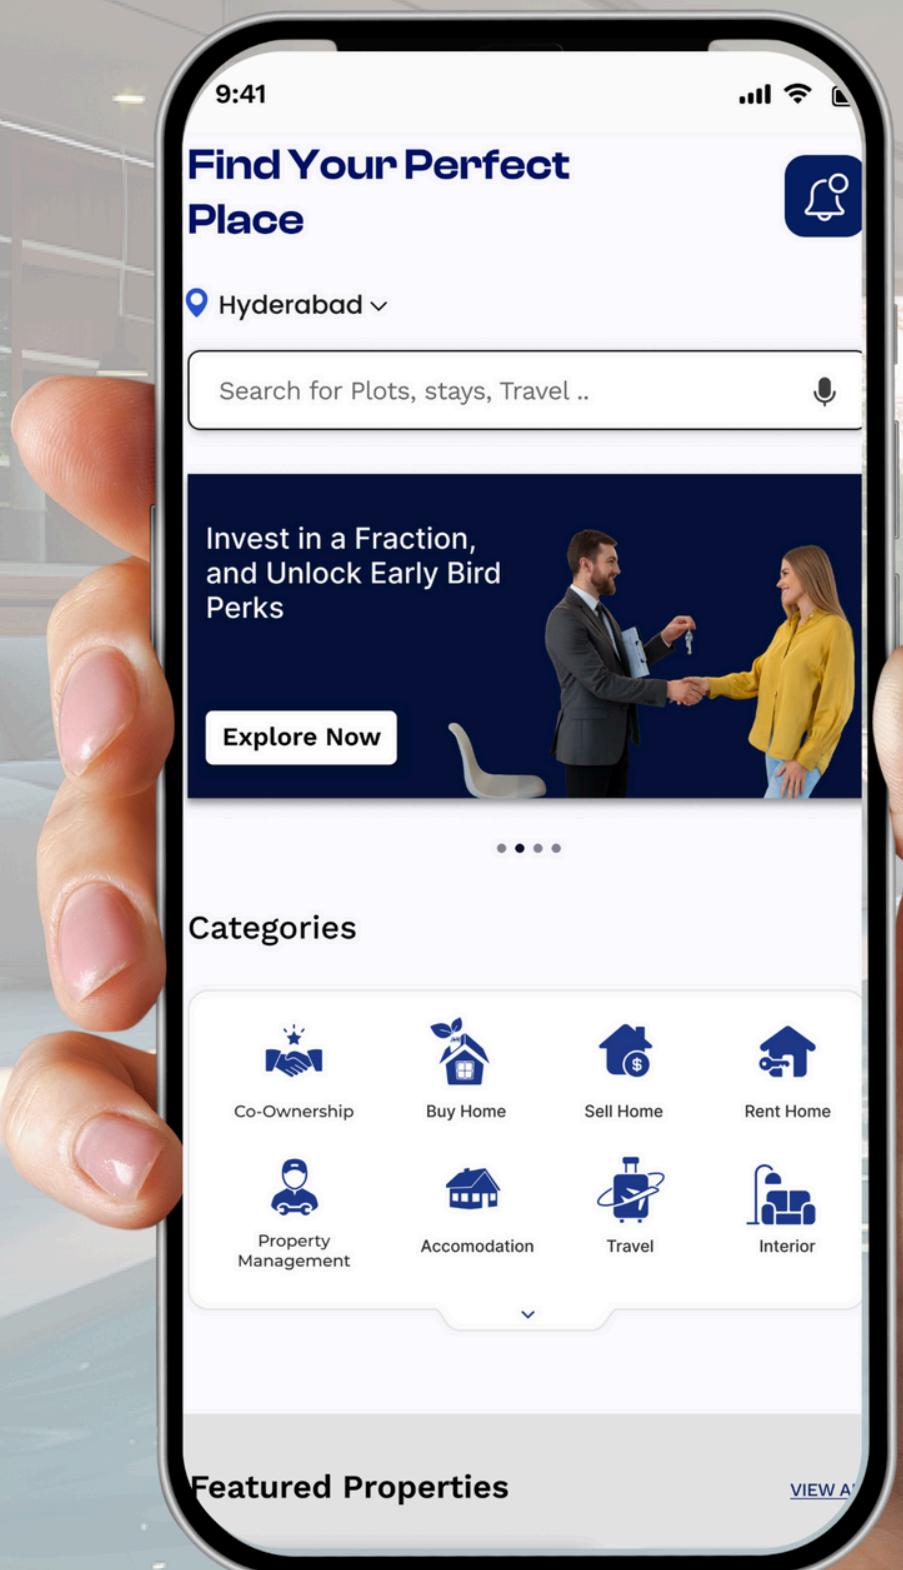

What is Fractional Ownership?

Fractional ownership refers to investing in a portion of a property, often a revenue-generating one, where the investors receive dividends based on the profits generated by the entity. The more the property is divided into smaller fractions, the lower the capital investment required, thus reducing the entry barriers to the real estate market and making it accessible to a broader population.
